### Subject Area

Lwb

### Course Summary

You will learn how to: • Make good use of existing fabric you have at home; • Cut fabric using a pattern or measurements; • Sew straight, neat seams with the correct seam allowance; • Make buttonholes, • Insert a zip; • Finish raw edges on the inside of your item; • Make a useful item from scratch!

### Experience/Skills Required To Join This Course

The items made will build in complexity over the course. Although all the projects are possible to be made with hand sewing, it is preferable to have a sewing machine and experience of using it to complete the projects more easily.

### What Is The Course About?

The aim of this course is to introduce or refresh sewing skills to make a range of attractive items to wear, for use in the home or to make as gifts. This is an ideal opportunity to re-use or repurpose fabrics to reduce waste and develop sustainability.

### For The Session/s You Will Need:

Sewing machine Fabric/clothes (could be repurposed) Lightweight interfacing - 0.5m should be sufficient Thread to match the fabrics A basic sewing kit: small scissors, hand sewing needles, pins, tape measure seam unpicker Stationery is also very useful-pen, pencil, ruler and paper etc You may will also need: • buttons • closed zips

### Additional Costs And/Or Resources:

Thread, binding, trims you would like to incorporate into the project items. Remember you can reuse fastenings such as poppers and buttons from the garments you no longer want. It's a good idea to save these before throwing away unwanted clothes. Please note: Any additional costs that arise for resources needed will be paid for by the learner, including scissors. We do provide some basic resources ie sewing machines, thread, bobbin cases, pins, however we find that most learners prefer to have their own supply of these to suit the project they are working on.
